

Goal: Design a resume analysis tool that has a couple displays:

1. Summarize resume
2. Determine role fit
3. Display words taken into account as skills

Requirements:

- Use transformers and pipelines
- Element three hugging face models at the bare minimum
- Break the text down using chunking for analysis purposes
- Display resume text on screen

What skills this project needs to portray in my work:

- Basic understanding of Hugging face
- Understanding segments of code
- streamlit
